

Performance. Security. Reliability.

An Industry leading Video Management and Webcasting Program!

Vulnerability Management

The Spot TV Media Platform 4.0 and its supporting content delivery network are frequently reviewed for potentially harmful vulnerabilities. We use enterprise-class security solutions and custom in-house monitoring tools to identify, analyze, and swiftly mitigate any potential weaknesses. We employ a number of third-party, qualified security tools to regularly scan our platform and perform continuous analysis of our codebase. We maintain a dedicated application security team to test and remediate any discovered or potential issues.

Physical Security

Broadcasting servers are hosted at Tier III, SSAE-16, or ISO 27001 compliant facilities. Our facilities feature 24-hour manned security, biometric access control, video surveillance, and physical locks. The sub-location facilities are powered by redundant fail over systems, each with UPS and backup generators. All systems, networked devices, and circuits are constantly monitored by both Spot TV and the co-location providers.

Exceeding Compliance

As of 2015, the industry standard for minimum encryption support was raised from SHA128 to SHA256 bit, a standard deployed by Spot TV for more than 5 years. Depending upon the capabilities of our end user, the new Spot TV Media Platform 4.0 Authentication can support up to 512bit encryption using the latest Windows encryption ciphers!

Access Control

Username and password access is aligned with a combination of security algorithms including IP monitoring, Dynamic IP Restrictions, 'Use-Once' Publishing point keys, among other undisclosed integrations. Our security architecture ensures isolation of customer data, stream source data, relay points and edge points.

Microsoft Engineering

A safer foundation – Spot TV is built upon the latest and most secure Windows .NET infrastructure by only in-house developers and American partner engineers. No out-sourced developers and No open source software!

Copyright Protection

Video Streaming services are protected under U.S. Intellectual Property Rights and Spot TV's Terms of Service. All users agree any screenshot, recording, duplication, or distribution of this copyrighted work is illegal. Users understand that legal action will be taken against them by Spot TV or your location's Management team for such copyright infringement.
